

- 
- The screenshot shows the ISI/STAR form interface. At the top, there are buttons for "Print", "Browse", "Help", and "Clear". Below these, the "DB:" field is set to "US-PGRUB:USPAT". The "Default operator:" is set to "OR". The "Exalts" checkbox is unchecked. The "Highlight all hit terms in body" checkbox is checked. The main search area contains the query: "component adj object adj model and request adj form and @ad<"20001006"". At the bottom, there are tabs for "BRS form", "ISI/STAR form", "Image", "Text", and "HTML".
